MEMORANDUM FOR : Chief, Materiel Branch, EPD
SUBJECT : Portable Laundry Facilities OXCART Area

1. The other evening I heard an oral description of a new product developed by Westinghouse, which apparently is a special trailer equipped with twelve automatic washers and dryers, completely plumbed to a central water and sewage inlet point on the trailer. It can be road transported with ease, according to the radio advertisement, and reportedly sells at retail for under \$20,000.

2. From the sound of it, I thought it might have some applicability to our requirements at the OXCART Area, perhaps not to mention elsewhere. I wonder if you might be able to get further descriptive information on it and evaluate the idea for use [REDACTED] I remember the washateria we had there in the previous Project, and anything would be an improvement over that so-called facility, for which I note we are still spending money in repairs.
